DETAILED ACTION

Election/Restrictions

1. Claims 1-91 are pending.
2. A telephone call was made to Samuel Dworetsky on 27 February 2006 to request an oral election to the below restriction requirement, but did not result in an election being made.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-61 and 80-91, drawn to transmitting a sequence of blocking frames from a Media Control Station to at least one non-Media Control Station, classified in class 709, subclasses 207, "Priority-based messaging."
 - II. Claims 62-79, drawn to an admission control entity performing centralized admission control, classified in class 709, subclass 226, "Network resource allocating."
4. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as transmitting a message with the highest physical layer priority level available, which does not require the use of centralized admission control. Invention II has separate utility such as performing

centralized admission control based on at least one end-to-end QoS message, which does not require the use of a message with the highest physical layer priority level available. See MPEP § 806.05(d).

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is required under 35 U.S.C. 121 to elect a single group disclosed as described above for prosecution on the merits because each of the groups requires different searches in different classes and subclasses.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
